SUMMARY

AI/ML-specialized Computer Science Engineer with professional experience in data annotation and predictive analytics at Innodata and Algonive. Proficient in Python, SQL, and AWS, with a proven ability to develop secure, intelligent systems like the "FRIDAY" virtual assistant. Eager to drive data-driven innovation and deliver scalable technical solutions in a high-impact professional environment.

SKILLS

- **Data Analysis:** Python (Pandas, NumPy, Scikit-learn), SQL (Expert), Excel, EDA, and Feature Engineering.
- **Visualization:** Power BI (Dashboards), Matplotlib, and Seaborn for data storytelling.
- **Databases & Cloud:** SQL Server, MongoDB, Snowflake, and AWS cloud data management.
- **Foundations:** Java, C, DSA, Machine Learning, Statistics, and CS fundamentals.
- **Soft Skills:** Professional Communication, Leadership, and Collaborative Project Management.

EXPERIENCE

Data Annotator

Innodata

January 2026 - March 2026, Noida, Uttar Pradesh

- Annotated high-quality datasets for AI/ML models, ensuring linguistic precision and contextual relevance.
- Refined AI content and conducted quality checks to optimize data accuracy and consistency.
- Streamlined processes via AI-assisted platforms, increasing completion speed by 25% for large-scale datasets.

Machine Learning Intern

Algonive

July 2025 - October 2025, Bangalore, Karnataka

- Built an XGBoost churn system on 50K+ records, achieving an 85% F1-score.
- Engineered 15+ predictive features (RFM), boosting model accuracy by 15% over baseline.
- Deployed BI dashboards to visualize feature importance, driving a 5% projected churn reduction.

PROJECT

PROJECTS Friday - A Hybrid AI Voice Assistant

github.com/Tushar2153/American-Sign-Language-Recognition-model

- Developed a hybrid voice assistant using Gemini API and Function Calling for advanced Natural Language Understanding.
- Reduced cloud API calls by 70% by engineering a local router for 15+ instant commands.
- Secured activation via a local LBPH Face Recognizer for real-time verification and optimized resource allocation.

Sign Language Recognition System

github.com/Tushar2153/FRIDAY-voice-assistant

- Engineered a real-time translation system using Computer Vision and ML to convert gestures into text, significantly advancing accessibility for the deaf community.
- Built a robust model to recognize hand signs by analyzing gestures and implementing comprehensive data preprocessing.

Insurance Data Insights Dashboard

github.com/Tushar2153/Insurance-Performance-Dashboard

- Designed and deployed a Power BI dashboard tracking 5+ core financial KPIs and calculating regional profitability using DAX.
- Integrated Text Analytics for automated sentiment analysis, identifying loss-making policies and driving retention strategies.

EDUCATION

B.Tech in Computer Science (Specialization in AI/ML)

D.R APJ Abdul Kalam Technical University • Lucknow, Uttar Pradesh • 2026 • 8.2

CERTIFICATIONS

Complete Data Analyst Bootcamp: Basics to Advanced

Udemy • 2025

Complete Python with DSA Bootcamp + LeetCode

Udemy • 2025
